

Walks Programme Editors Report For 2025 AGM

It is around 17 years ago that I joined the SEBR Committee, my role being to coordinate the short Sunday walks. At that time the group had just started using computer spreadsheets (Excel) to merge data from the walk leaders and to provide input to the websites and the printed programmes (remember those?) without need for re-typing.

I seem have been manipulating walks data on spreadsheets ever since – at least until a few months ago!

The latest website (implemented by Brian Poulton) links closely with the Ramblers walks database. Initially we continued to enter walks using a spreadsheet. More recently most walk leaders enter their own walk details, so there has been much less for me to do.

It is now time for me to step down from the Committee, and I do so with lots of good memories. Our small dog will continue to encourage us to walk, but both speed and distance are less than just a few years ago.

Best wishes to you all.

David Hunt
